Subject: Issuance of a Conditional License for West Nile Virus Antibody,

**Equine Origin** 

To: Biologics Licensee, Permittees, and Applicants

Veterinary Services Management Team Directors, Center for Veterinary Biologics

Area Veterinarians in Charge, VS

State Veterinarians

The Animal and Plant Health Inspection Service (APHIS) has issued a conditional United States Veterinary Biological Product License to Novartis Animal Vaccines, Inc., Establishment No. 303, Larchwood, Iowa, for the manufacture and distribution of West Nile Virus Antibody, Equine Origin.

A veterinary biological product regulated under the Virus-Serum-Toxin Act must be shown to be pure, safe, potent, and efficacious before a veterinary biological product may be issued. The regulations in 9 CFR Part 102 regarding the licensing of biological products provide that a conditional veterinary biological product license may be issued to meet an emergency situation, limited market, local situation, or other special circumstances. The special circumstance addressed here is the absence of other licensed veterinary biological antibody products intended as an adjunct to other available therapy in the treatment of disease caused by West Nile Virus in horses.

This conditional license was issued following the acceptance of data supporting product purity, product safety under normal conditions of use (field safety), and demonstration that the product has a reasonable expectation of efficacy. This license will expire in one year. In accordance with 9 CFR Part 102, progress toward regular licensure must be pursued for reissuance of the conditional license.
